OTHER INSPEC SERVICES

SDI

(Selective Dissemination of Information.)
This is a service individually tailored to the requirements and interests of the engineer or research worker. Every two weeks details of information relevant to the interest profile of the individual subscriber are selected from the data being processed for the INSPEC Database.

TOPICS

This is an SDI service based on standard profiles. There are over 80 subjects covering high-activity areas of research and development. This is an inexpensive service designed to alert engineers and researchers to the availability of literature within their subject area.

TAPES

The INSPEC Tape Services contain all the information included in the INSPEC publications. They are updated 50 times per year. They enable the larger research and development organisations to produce their own internal information and current-awareness services.

The emis Datareviews Series of Books

The Datareviews Series comprises books on semiconductors and other electronic materials. Each reference book contains numerous specially-commissioned contributions from the world's leading experts in semiconductor materials research and combines a highly-structured presentation with expert guidance to the literature and a comprehensive subject index.

Current Books in the Series cover:

Diamond
Silicon
Amorphous Silicon
Gallium Arsenide
Aluminium Gallium Arsenide
Indium Phosphide
Indium Gallium Arsenide
Cadmium-based Compounds
